CAREER OBJECTIVE

Full-Stack Developer with hands-on experience in Django backend development and cross-functional client delivery. Skilled at designing scalable systems, secure workflows, and end-to-end automation, with a track record of implementing solutions across multiple client engagements. Passionate about building reliable software and growing through collaborative, real-world projects.

TECHNICAL SKILLS

- **Programming Languages:** Python (Proficient), Java (Proficient), JavaScript, HTML, CSS (Proficient)
- **Databases:** SQL, PostgreSQL, MongoDB, SQLite
- **Frameworks:** Django (Proficient), Java Spring Boot (Basic Exposure), React.js
- **Tools:** Postman, VS Code, IntelliJ IDEA, Git, GitHub
- **Operating Systems:** Linux, Windows

LANGUAGES

- English (Read and Write)
- Hindi, Marathi, Bengali (Spoken)

EDUCATION

- M.Sc. Computer Science (in progress) — Abeda Inamdar Senior College | 2025–27
- B.Sc. Computer Science — Abeda Inamdar Senior College | CGPA 8.78 (89%) | 2022–25
- HSC Science — Poona College of Arts, Science and Commerce | 56% | 2021–22
- SSC — S.S.S. Sharda Vidyalaya | 63.60% | 2019–20

WORK EXPERIENCE

NuviraTeck | Full-Stack Developer & Implementation | Nov 2025 – Present | Remote

- Working full-time as a Full-Stack Developer, implementing and delivering solutions across three client accounts, including two engagements for Namma Yatri and one for Tech Mahindra.
- Developed a workflow automation bot using Django, HTML, CSS, and JavaScript, implementing custom workflows with Zendesk integration to automate ticket routing and agent handoffs.
- Built and configured Zendesk workflows and bots (Workflow Builder, triggers, macros, automations), and integrated secure APIs for reliable ticket, user, and data sync across client environments.
- Implemented messaging and Copilot features (suggested responses, context summaries, next-step recommendations); also delivered solutions on Pipedrive and Fynd as part of client project work.
- Created knowledge base articles and training materials, and led hands-on onboarding sessions to help agents adopt new workflows and tools.

PROJECTS

1. BusKarro — Bus Reservation System <https://github.com/senku0-0/Buskarro.git>

- Developed a scalable backend with Django and DRF, implementing custom JWT authentication, REST APIs, and email-based ticket confirmation; designed admin and user dashboards with CRUD and real-time ticketing features.
- Deployed on Render with optimized static file setup, enhancing user experience through a dark/light mode toggle and ensuring reliable performance across environments.

2. Talking Meow — Chatting Web App <https://github.com/senku0-0/RPS.git>

- Built a Django chat system with secure sessions, dynamic message rendering, and responsive UI (HTML, CSS, JS); deployed on Render with static file setup.
- Integrated Redis and a WebSocket-ready backend with session middleware to enable real-time communication and reliable user management.

3. Yatri Bandhu — Custom Bot [Private repo]

- Developed a custom chatbot using Python and API integrations, enabling real-time communication and automated ticket handling with a scalable, modular backend design.
- Implemented AI-driven workflows with triggers, webhooks, and escalation logic, streamlining customer support tasks and improving response efficiency.

MINI PROJECTS

- YouTube UI Clone (Frontend) — <https://github.com/senku0-0/Youtube-Ui> | Responsive UI (Frontend) — <https://github.com/senku0-0/responsive>
- Number Guessing Game (Python & Java, No UI) — <https://github.com/senku0-0/Guessinggame>
- MLOps — Vehicle Insurance Domain — <https://github.com/senku0-0/MLOPS-Vehicle-insurance-domain>
- MLOps — Complete Data Pipeline — <https://github.com/senku0-0/MLOps-complete-data-pipeline>
- Diabetes Prediction Model — https://github.com/senku0-0/Diabetes_prediction_model | ROCK-MINE Predictor — https://github.com/senku0-0/ROCK_MINE.git

CERTIFICATIONS

- Python Backend Development (Django) — Techfest, IIT Bombay (Feb 9–10, 2024) [Merit Position]
- Java Backend Development (Spring Boot) — ICT Academy (Nov 2024 – Jan 2025)
